Experience

Technology Developer Intern

Barclays

Whippany, NJ

June – August 2026

- Incoming intern focused on building scalable software, collaborating with cross-functional teams, and applying best practices in backend development and code quality within a fintech environment.

CS and Mobile Development Instructor

Prime Factors Learning Lab

Newark, NJ

Summer 2024 & 2025

- Designed and delivered a full CS curriculum across two summers, teaching 30+ students core concepts including data structures, Git workflows, and mobile development with Swift and Python.
- Led student teams in building iOS applications, progressing from frontend prototypes to fullstack apps with backend integration (see Swift Academy under Projects).

Projects

Swift Academy

estuardolopez.com/projects/swift-academy

PFL

Present

- Developed a fullstack iOS learning app using a scalable MVVM architecture and Firebase for secure authentication and data storage, with plans for App Store release.
- Built an AI-powered Code Coach using Python, FastAPI, and the OpenAI API.

Hive

estuardolopez.com/projects/hive

Independent

2025

- Fullstack Hive game with Python backend (FastAPI, Pytest, Poetry) and React (TypeScript) frontend.
- Designed a modular MVC system with RESTful APIs and scalable game state. Implemented turn-based gameplay with a responsive hex grid, drag/zoom, action highlights, and graph-based movement.

Personal Website

estuardolopez.com/projects/personal-website

Independent

2025

- Responsive developer showcase with Next.js and Tailwind CSS, using interactive components and Vercel.

Santorini

estuardolopez.com/projects/santorini

CMU

2025

- Fullstack Santorini game with Java backend (NanoHTTPD), includes extensive UML documentation.

Skills

- **Prog Languages:** Python, TypeScript, Java, C, Swift, JavaScript, HTML/CSS, Standard ML
- **Technologies:** FastAPI, Firebase, Next.js, SwiftUI, RESTful APIs, React, Tailwind CSS
- **Development:** GitHub, Agile and Scrum, DevOps, CI/CD, Docker, LLMs, Testing, UI/UX
- **Data Engineering:** SQL (MySQL), NoSQL (MongoDB, Firestore), Data Pipelines and ETL
- **Core & Team:** OOP, DS and Algos, Communication, Collaboration, Adaptability, Organization
